Technical Skills

Business Intelligence & Analytics: Power BI, Tableau, Microsoft Excel, Dashboard Development, Data Visualization, KPI Reporting, Business Intelligence, Statistical Analysis, Data Storytelling.

Programming Languages: Python, SQL, R, Java, C++, C, Dart, Bash.

Data Engineering & Processing: ETL/ELT Pipelines, Data Modeling, Data Transformation, Data Integration, Data Cleaning, PySpark, Apache Spark, Databricks, SQL Server, Snowflake, Oracle, Azure Data Lake.

AI & Cloud Technologies: Azure, AWS (EC2, ECS, RDS), Kubernetes, AI Solutions, MCP Development, LLM Applications, Cloud Data Platforms.

Software Development & Tools: Git, Agile Methodologies, Scrum, Testing, CI/CD, System Design.

Education

Master of Applied Computing (AI Stream)

Sep 2024 – Apr 2026

University of Windsor, Windsor, ON

- Cumulative average: 86.11% — all degree requirements completed (33 credit hours).
- Relevant Coursework: Artificial Intelligence, Natural Language Processing, Advanced Database Topics, Distributed Systems, Advanced Computing Concepts, Advanced Software Engineering.

Bachelor of Science in Computer Science and Engineering

Jan 2019 – Jun 2023

Ahsanullah University of Science and Engineering, Bangladesh

Work Experience

AI Solutions and BI Developer Co-op

Sep 2025 – Present

FGF Brands, North York, ON

Technologies: Power BI, Databricks, PySpark, SQL Server, Azure, Python, AI Solutions

- Designed and published interactive Power BI dashboards across Dev, UAT, and Production environments, while redesigning deployment pipelines to reduce deployment time and manual effort by 60%.
- Collaborated within the Sales Marketing Intelligence (SMI) agile team by actively participating in sprint planning, daily standups, sprint reviews, and retrospectives to deliver scalable BI solutions.
- Engineered and maintained scalable data pipelines across multiple data platforms, enabling efficient data ingestion, transformation, and integration workflows for enterprise reporting and analytics.
- Contributed to AI Transformation R&D initiatives focused on enterprise data restructuring, secure custom MCP development, and AI enablement for internal stakeholders.

Python Developer Consultant

Sep 2023 – Aug 2024

Techscope, New York, USA (Remote)

Technologies: Python, Pandas, JSON and ANTLR

- Developed scalable Python applications for data processing, transformation and analysis and regularly was involved in cleaning and preparing data after acquisition.
- Devised SQL-based data ETL (Extract, Transform, Load) pipelines to optimize data processing workflows on a transactional database of over 100,000 entries.
- Performed comprehensive unit testing using Python's unittest framework, reducing error rates by 25%, enabling early bug detection, and enhancing software reliability.
- Engaged with clients directly to gather requirements, analyze business processes, and integrated them into team sprints to facilitate collaboration.

Related Projects

Predicting Movie Ratings from Plot Summaries

Feb 2025 - March 2025

Team Research, University of Windsor, ON

Technologies: Python, Pandas, Pytorch, Scikit-learn, Selenium and BeautifulSoup

- Conceptualized a Large Language Model (BERT) to develop a program to predict movie ratings using pre-release data, specifically only using plot summaries as input.
- Utilized two publicly available corpora and created a custom dataset with 17,877 records by scraping the IMDB website, ensuring a comprehensive dataset for analysis.
- Exceeded baseline model performance by 11% with our 81% F1-score and deployed the optimized model on Huggingface Spaces for seamless accessibility and evaluation.

Churn BigML: Telecom Customer Churn Prediction

Feb 2023 - May 2023

Team Research, University of Windsor, ON

Technologies: Python, Scikit-learn, Churn Prediction, Correlation Analysis, Anomaly Detection

- Implemented a machine learning model by taking an analytical approach to predict telecom customer churn, helping companies retain customers and reduce churn rates.
- Analyzed telecom customer data (Churn BigML dataset) with 3333 instances and 16 features using various machine learning algorithms and mathematics including KNN, SVM, LR, RF, Adaboost, LGBM, GradientBoosting, and XGBoost.
- Achieved high accuracy rates with LGBM and XGBoost models, both reaching 95.74
- Identified the most important features impacting churn prediction using feature importance analysis.

Related Technical Training

Agile Foundations – The Rise of Knowledge Workers (LinkedIn Learning)

Jan 2025

- Acquired hands-on understanding of Agile principles, Scrum roles, and iterative development, emphasizing team collaboration, adaptability, and continuous improvement in dynamic, knowledge-driven environments.

Ultimate AWS Certified Solutions Architect (Udemy)

Jun 2024

- Gained experience in designing and deploying scalable, secure, and cost-effective AWS cloud solutions and became familiar with services like EC2, S3, Lambda, RDS and IAM.

Spark and Python for Big Data with PySpark (Udemy)

Oct 2023

- Enhanced proficiency in distributed computing, data wrangling, optimization techniques for big data workflows, and overall knowledge on processing and analyzing large-scale datasets

100 Days of Code: The Complete Python Pro Bootcamp (Udemy)

Sep 2023

- Strengthened Python programming skills through hands-on projects covering automation, web development, and data science while using libraries like Flask, Pandas, Selenium, and TensorFlow for real-world applications.

Extracurricular Activities

VentureU Bootcamp

Feb 18-22, 2025

Office of Innovation, Partnerships and Entrepreneurship, University of Windsor, ON

- Benefited from expert-led 5-day-long bootcamp, enhancing problem-solving capabilities and fostering the development of practical, applicable solutions.
- Participated in team-based problem-solving and demonstrated presentation skills through competitive pitch competitions, demonstrating the ability to effectively communicate complex ideas.

Event Volunteer

Oct 2024 - Aug 2025

University Community Church, Windsor, ON

- Assisted with setup, serving, dishwashing and cleanup of Sunday meals for students.
